

  
**papilio**

A lightweight and comfortable chair,  
with a cocoon-like back support reminiscent of fluttering butterfly wings

Born in Schleswig in 1962, Justus Kolberg studied industrial design and realized many projects in collaboration with well-known enterprises. The brilliant design makes Justus Kolberg a rising star in the German industrial design field. His style features a unique, simple and natural style inspired by the modern architectural technology.

JUSTUS KOLBERG

German Classic Design , an expression of noble elegance

# A chair for every office

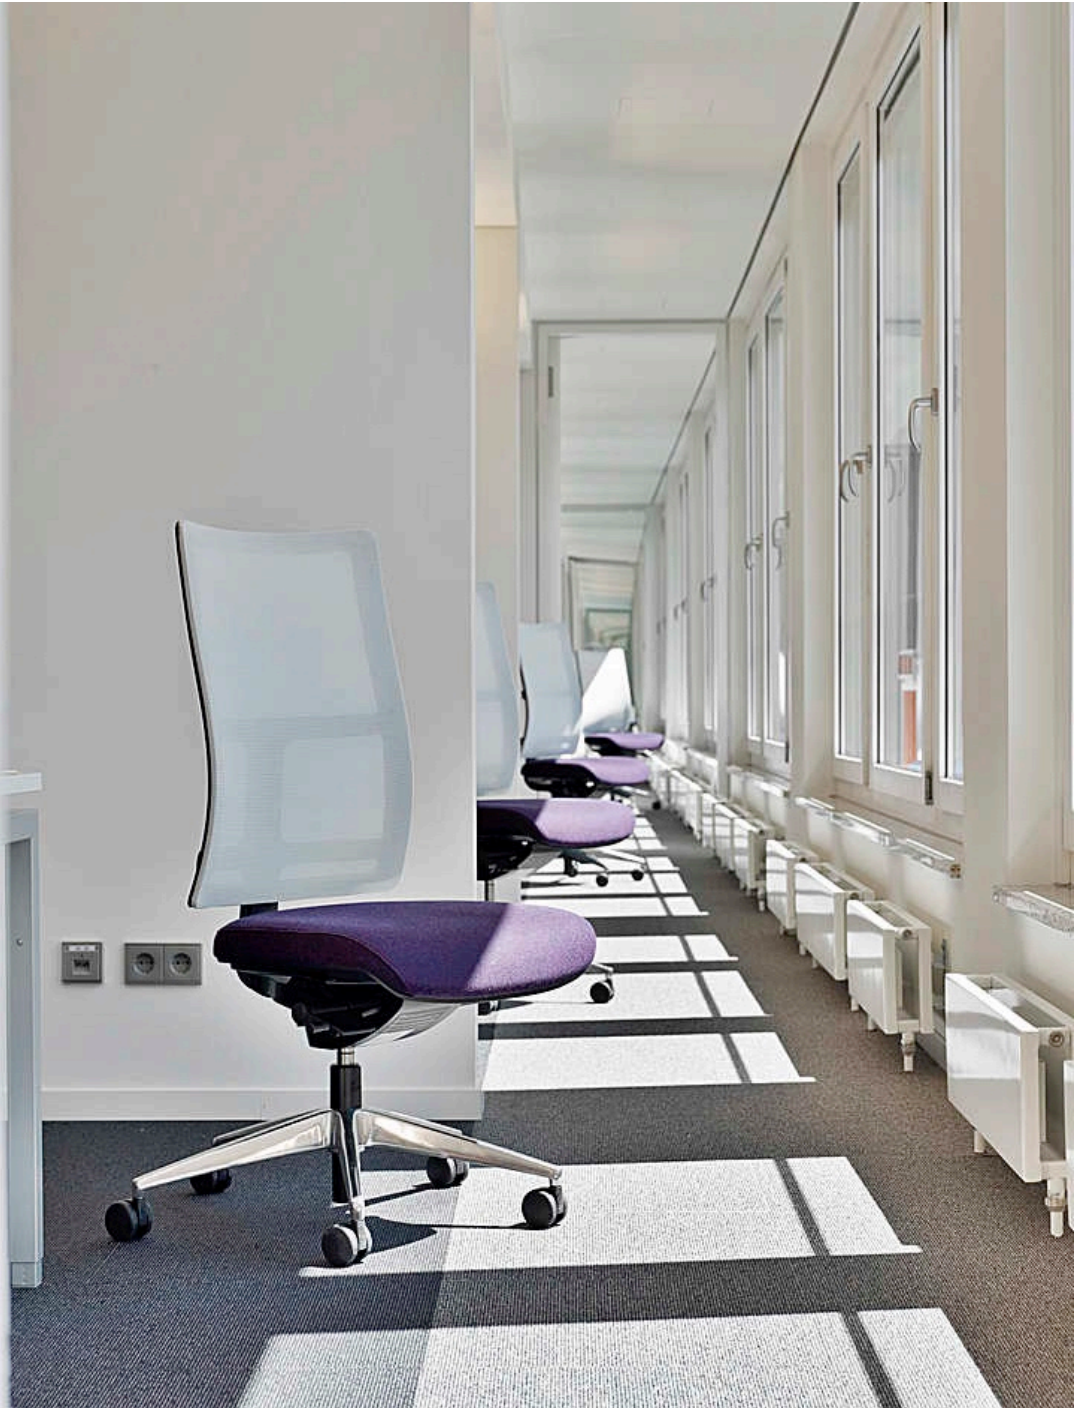

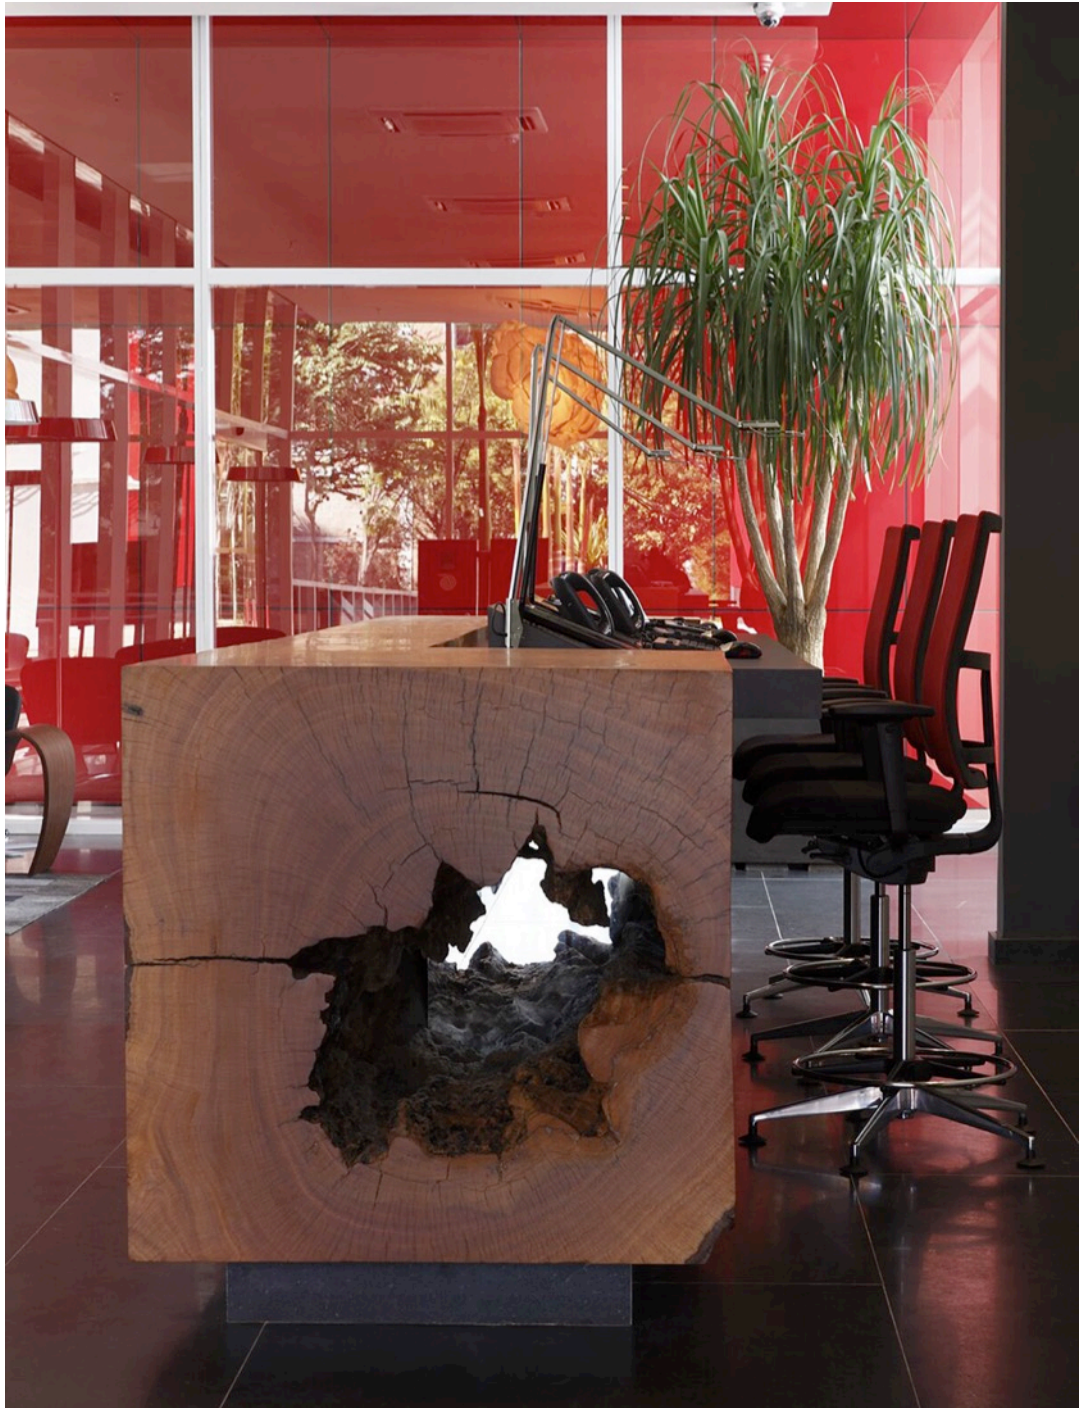

## High comfort due to the exquisite craft

Papilio' s backrest stands up with an ergonomic arch to fully support and protect vertebral column, cervical vertebra, lumbar and shoulders. The mesh backrest enhances comfortableness and breathability.

## Customized Comfort

Every component and overall design is aimed at the healthiest sitting posture.

### Seat-height Adjustment

Through this function, the chair can be perfectly matched for the height of the user, creating a comfortable and relaxed feeling.

### Depth adjustable seat

The seat depth is adjustable to the user's build and size.

### Dual synchronized tilt

Take a seat and experience the real comfort of dual synchronized tilt. Discover this new lightness with these ergonomic swivel chairs by adjusting the back and seat according to your need.

### Adjustable lumbar support

The height and depth of lumbar support is individually adjustable, bringing the user a floating seat experience while protecting their vertebral column.

### Forward inclination tilt adjustable

With our Papilio chair, it is possible to incline the complete upper part of the seat in a 3° angle so as to protect the vertebral column, cervical vertebra and shoulders, thus reducing any health risk related to sitting all day at work.

### Adjustable armrests

These armrests can be adjusted forward, backward and side-ways in height, depth and width.

### Optional headrest and coat hanger

Headrest: the headrest can relieve strain on the neck and protect your vertebral column.

Coat hanger: Papilio takes care of every detail. With the coat hanger, there is no need to worry about crushed jackets or suit coats.

# Dedicated to build sustainable office environments

## Raw material safety:

All the raw materials selected for Papilio are free of defect and environment-friendly.

## Light weighting design:

The light weighting design reduces the weight of the chair to the minimum possible for the weight bearing load. The raw materials and transportation energy are offset by the light chair and the space saving packaging.

## Optimized structure:

The whole chair is made by 13 component parts; it can be dismantled and reassembled quickly. The test results show that it can be dismantled in less than 15 min.

## Recyclable materials:

Papilio chairs are recyclable up to approx. 96 % of its total weight which will contribute to resource protection via reuse and recycling.

## Waste recovery:

Various Type of manufacturing process wastes are collected by professional waste processing companies.

## swivel chair series :

Luxury Version    Profession Version    Standard Version    Comfort Version

## Chair armrest:

3D multi-function armrests    Height adjustable armrests    Fixed armrests
