

LANE

INTRODUCTION

With a design that's minimalist, yet passionate; stationary, yet conveying a sense of motion; attractive, yet offering great performance; and blending reason and emotion, LANE is a design that's hard to refuse.

DESIGNER

Jehs + Laub

Markus Jehs (born in 1965 in Stuttgart) and Jürgen Laub (born in 1964 in Ulm) have met each other during the academic studies of industrial design at the Hochschule für Gestaltung Schwäbisch Gmünd and became friends after an internship in New York in 1990. After they graduated in 1992 they set up Jehs + Laub in 1994. From that time on they started to design furniture and lamps. Inside Germany, they design office furniture and common furniture for Renz, Schnbuch and Thonet, and design showrooms for Mercedes-Benz.

The Lane, Size, Star For Renz are all their masterpieces. Their designed products have won all major prizes.

HIGHLIGHT

Delicate design

The focus lies on the tabletop, which seems to be formed from a single piece. The containers are available in various colors in high-gloss or matte finish and can be custom combined.

Exquisite craft

MATSU' s partner, RENZ integrates its fantasy for German aesthetics into this design. Smooth grain connection, seamless chrome electroplate craft contribute to monolithic appearance, expressing high quality of art.

Smart cabling

The table and the container are connected by a hinge that enables the table to be moved and also accommodates the power supply. Chargers, transformers, cables - everything disappears into an aluminium cable channel under the table. Vertical cable management can run through the container or along the inside of the end panel, making it barely visible.

Great storage ability

Floor cabinet integrates various functions. We have different colors for you, with different effect, polished or matt, enabling flexible combination.
